

## E-Catalog

The Ekornes e-catalog has been developed as a tool to highlight the entire line of Ekornes products on your website. The Ekornes e-catalog is kept current by Ekornes so you do not have to worry about updating the product line to keep it current. All the information that a consumer would need to know about our product is just a click away - within your own website! There is also not a dealer locator so you won't have to worry about consumers going somewhere else. All of the navigation points back to your site.

By linking to our e-catalog you greatly reduce the cost and time needed to maintain your site. Simply follow the below instructions and start clicking.

**e-Catagog Homepage**

**Kensington page with info buttons**

## Installation

There are a few different ways of installing our e-catalog, however, we would like you simply to use a direct link that opens in a new window. Simply place the below code to the place where you would like to have the e-catalog on your site:

```
<a href="http://www.ekornes.com/us/e-catalog/" target=_blank">Ekornes and Stressless E-catalog</a>
```

When using this method as opposed to a JavaScript popup or frame you ensure that your customer will get the experience they expect regardless of browser and operating system.

You may of course style the link to suit your needs or even swap it with an image link. If you choose to use an image, please add "Ekornes and Stressless E-Catalog" to the image alt tag like this:

```
<a href="http://www.ekornes.com/us/e-catalog/" target= blank"></a>
```
